## adjuvant

1. <pharmacology> A substance that, when added to a medicine, speeds or improves its action which aids another, such as an auxiliary remedy.
2. <immunology> A substance added to a vaccine to improve the immune response so that less vaccine is needed to produce a non-specific stimulator (for example, BCG vaccine) of the immune response.

Origin: L. Adjuvans = aiding

(18 Nov 1997)

---

**Previous:** adjustable articulator, adjustment, adjustment disorders, adjutancy, adjutant, adjutrix

**Next:** adjuvant analgesic, adjuvant chemotherapy, adjuvants, immunologic
